Using The Opticon Scanner

- Scan the product using this button. Scanning a barcode once will result in a quantity of one. If you would like to order more than one item, you may scan the item the amount of times in relation to the quantity that you would like to order, or you can scan the quantity card. To use the quantity card scan the number you would like. For example, if you want 102 you would scan the item that you wish to order and then scan on the quantity card "1" "0" "2". You may also adjust the quantity on the website when you place your order.
- 2. Hold this button until you hear a beep this usually takes approximately 10 seconds.
- 3. Scan the product with this button to remove item from list.

A) If you used the Quantity Card to order multiple quantities you will first have to Delete Scan the "Numbers" from the Quantity Card in reverse order before scanning the barcode of the item you want to delete.

B) If you scanned the item multiple times it will take an equal number of Delete Scans to remove it from memory.

C) A long low tone means the item was not already in the scanner, or you've successfully deleted multiple scans.

Note: Holding the large Scan button for longer than 10 seconds will turn off the unit's sound. This is indicated by the flashing green scan light switching to flashing red and then shutting off altogether. To turn the Sound back on again, hold the Scan button for 10 seconds until the scan light turns to flashing red, followed by a two-tone beep.

Configuring Your Scanner

In order to scan the compressed version of the UPC images, you will need to reconfigure your opn-2001 scanner. To do this you have two options. Option 1 - Go to C:\FMS_Opticon\Software\Optional Installations Files. Double-click on the OPN2001 file. Screenshots are included to show you step by step what you need to do.

Option 2 - Scan the three (3) barcodes below from top to bottom. Please Note: Once you scan the top barcode, the scanner light will stay on. You do not need to push the scan button for each barcode. After the first barcode is scanned, move down the next two pausing at each for the notification beep to inform you that is has been scanned.

Figure: 6.1 UPC-E Configuration Barcodes

Before you can begin to setup your scanner, you will need to locate the port number that the scanner is connected to. To do this, plug the scanner into the USB port that you will be using and wait a few seconds while Windows installs the device. It should display a notification when complete. In the search box in the lower left, type device manager and select it from the list. See Figure 7A. Once Device Manager is open, click the arrow (>) next to Ports (COM & LPT) to view all the ports and find the Opticon scanner. It is shown in Figure 7B as using COM3. This will be needed for the program settings on page 11.

Figure 7A - Using the search box to open Device Manager

Figure 7B - Select Ports (COM & LPT). Find Opticon Scanner and locate COM #.

Locating Your COM Port - Windows 7

Before you can begin to setup your scanner, you will need to locate the port number that the scanner is connected to. To do this, plug the scanner into the USB port that you will be using and right-click on My Computer and select Manage. You should see a screen similar to the image below.

Figure: 7.2 - Select Device Manager and go to Ports (COM & LPT). Find Opticon Scanner and locate COM #.

Before you can begin to setup your scanner, you will need to locate the port number that the scanner is connected to. To do this, plug the scanner into the USB port that you will be using and right-click on My Computer and select Manage. You should see a screen similar to the image below.

Figure: 8.1 - Right-click on Computer and select Manage

Figure: 8.2 - Select Device Manager and go to Ports (COM & LPT). Find Opticon Scanner and locate COM #.

Installing FMS Opticon Software

- 1. To download the necessary software. Go to www.resoftware.net/downloads.html.
- 2. Download the FMS Opticon zip file.
- 3. After the file has finished downloading, open the zip file and extract the setup file inside.
- 4. Once the file has been extracted, you are ready to run the setup program.
- 5. Install Software to C:\FMS_Opticon (see image below)
- 6. Your software is now installed and a shortcut (FMS_Opticon) should be on your desktop.
- 7. Depending on your computer, you may need the OPN-2001 driver. This is available in C:\FMS Opticon\Software\Optional Installation Files.
- 8. If you have any errors during the install, update your .NET Framework to 3.5 sp1. This file is available at www.resoftware.net/downloads.html. The download is called FMS Opticon Optional Files. There are two files in this download, one is .NET 3.5 SP1 (dotnetfx35setup) and the other is Windows Installer 3.1(WindowsInstaller-KB893803-v2-x86). If your are currently using Windows XP SP3 then you do not need to worry about using Windows Installer 3.1.

揚 FMS Opticon Setup	
Select Installation Folder	
The installer will install FMS Opticon Setup to the following folder. To install in this folder, click "Next". To install to a different folder,	enter it below or click "Browse".

Figure: 9.1 - Folder location on install

Now it is time to change your settings for your desired use. Open the software by using the shortcut on your desktop or in your start menu. Click on the "Settings" tab. Your screen should look like the image below. You need to set the device port to the port number that you located earlier in the Device Manager. You will also need to set your "Output" choice on this screen. You have 3 available choices, Textbox, File, and WebService. Textbox will display your barcodes in the box on the "Main" tab. File - will save your barcodes to a text file that you use to upload from the website. WebService - This option will require you to input your username and password. It will then read the barcodes and login you into the website. After you make your decision, press the "Save and apply" button. You may change your "Output" setting at anytime, just remember to press "Save and apply" after any change. **Please note**: Your device port number may change if you plug your scanner into a different USB port. If you get an error during barcode retrieval, recheck your COM Port in Device Manager.

Figure: 12.1 - Setting up the File option.

If you choose the "WebService" option, you will need to input your user name and password by clicking on the "WebService" tab and filling out the textboxes there. This is the same user name and password that you use to login in to the web site. After your information has been entered press the "Save and apply" button.

Figure: 13.1 - Inputting User name and password.

This concludes the setup of the scanner. Continue reading to learn about uploading your order

Recommended Action: Clear the device at the beginning of your new order. To clear the device, hold the SMALL button on your scanner until you hear a beep -about 10 seconds. Remember to clear you device before scanning your new order or you risk sending duplicate orders.

Use the scanner to scan your items and build your order.

Retrieve Barcodes

In order to get your order from the scanner and into your cart, follow these simple steps. Plug your scanner into your computer via the USB cord that comes with it. After the scanner is connected, open FMS_Opticon and click the large "Read Barcodes" button. If you chose the "WebService" output you may proceed to page 23 to continue with the guide.

Figure: 20.1 - Web Order Entry Home Page

Scanner Upload - File Method

If you chose the "File" output option and are ready to upload your order here are the steps that you will need to follow to accomplish that. If you have followed the steps in this guide to this point, you should be at the home page (OrderEntry.htm). On this screen you will see a "Scanner Upload" button located in the "Quick Item Entry" section of the page. Click the "Scanner Upload" button. This will open up a file upload form. Click the "Choose File" button and choose the file containing your barcodes. This file should be located at "C:\FMS_Opticon" The file name will look similar to "Barcodes2018-08-29122442" This filename is based on the time and date that the file was created. Choose the most recent file and click "Open". After selecting your file press the "Upload" button. Your order will now be placed into your shopping cart.

Figure: 21.2 - Scanner Upload Section

Scanner Upload - WebService Method

If you uploaded your order using the "WebService" method, your screen should look similar to the image below.
